LA FONDATION LUCIEN-PICHÉ

2022 Scholarship Program

The **Fondation Lucien-Piché** is a non-profit charitable organization that was created in 1987 after the passing of Professor Lucien Piché, a chemistry Professor who was the first secular person to occupy a Vice-President position at the Université de Montréal. The Foundation's mission is to encourage undergraduate chemistry students from Québec universities by awarding merit scholarships. The Foundation is managed by a board of directors composed of university Professors, researchers and professionals from the field of chemistry. All members of the board of directors are volunteers. The funds raised and administered by the Fondation are entirely used to support students via scholarships and to cover the operation and maintenance costs. Since its creation in 1987, the Fondation Lucien-Piché awarded close to 120 scholarships for a total of more than 120,000\$. Many of our awardees now occupy leading positions in academia and industry in the province of Québec and abroad. The Fondation is sponsored by 10 organizations that are based in Québec, Canada and USA operating in various fields of chemistry.

Nicola Teolis
Bourse Lucien-Piché
Ordre des chimistes du Québec

Nicola is studying Chemistry at the Université de Montréal.

He received numerous recognitions including two NSERC undergraduate student research awards, the silver medal from the Canadian Chemical Society and the excellence certificate from the Royal Society of Chemistry.

Nicola has also been an educator and volunteer at the centre Philou and the Olier camp.

Camille Theaud
Bourse Lucien-Piché
Gilead

Camille is studying Chemistry at Université de Sherbrooke.

She received a CCVC summer undergraduate research scholarship and is co-author on a 2022 article appearing in *Molecules*. She has participated in four research internships in both academic and industrial labs.

Camille has also animated science activities at the Shergym camp.

Kaixiang Wang
Bourse Lucien-Piché
Corealis Pharma

Kaixiang is studying Chemistry at McGill University.

He received a SURA undergraduate research scholarship and both the Canderel Rising Star and Herbert J Brennen departmental awards. He has participated in four research internships in academic labs.

Kaixiang has volunteered as a mentor and also been a Tomlinson tutor in the Chemistry department.
