LA FONDATION LUCIEN-PICHÉ

2021 Scholarship Program

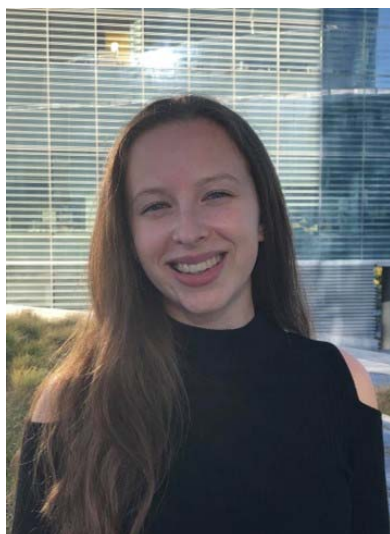

The **Fondation Lucien-Piché** is a non-profit charitable organization that was created in 1987 after the passing of Professor Lucien Piché, a chemistry Professor who was the first secular person to occupy a Vice-President position at the Université de Montréal. The Foundation's mission is to encourage undergraduate chemistry students from Québec universities by awarding merit scholarships. The Foundation is managed by a board of directors composed of university Professors, researchers and professionals from the field of chemistry. All members of the board of directors are volunteers. The funds raised and administered by the Fondation are entirely used to support students via scholarships and to cover the operation and maintenance costs. Since its creation in 1987, the Fondation Lucien-Piché awarded close to 120 scholarships for a total of more than 120,000\$. Many of our awardees now occupy leading positions in academia and industry in the province of Québec and abroad. The Fondation is sponsored by 10 companies that are based in Quebec, Canada and USA operating in various fields of chemistry.

Alexanne Bisson

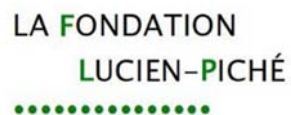

Bourse Lucien-Piché

Alexanne is studying Chemistry at the Université de Montréal.

She received numerous recognitions including an NSERC undergraduate student research award, the silver medal from the Canadian Chemical Society and the Schulich Leader scholarship. She has participated in three research internships.

Alexanne has also been a tutor for students both at the primary and CEGEP levels for a number of years.

Céline Gosselin

Bourse Lucien-Piché/Ordre des chimistes du Québec

Céline is studying Chemistry at Université de Sherbrooke.

She received an NSERC undergraduate student research award on two occasions. She has participated in three research internships in academic labs and one in an industrial setting.

Céline also volunteered for 7 years to entertain children at numerous community events.

Jessica Alcée

Bourse Lucien-Piché/Corealis Pharma

Jessica is studying Chemistry at Université Laval.

She received an NSERC undergraduate student research award and a PROTEO scholarship. She has participated in two research internships in academic labs.

Jessica has volunteered with a number of organizations including the association for Down's syndrome in Montreal.

Clara Jans

Bourse Lucien-Piché/Gilead

Clara is studying Chemistry at McGill University.

She received an NSERC undergraduate student research award on two occasions. She has participated in two research internships with a third in an industrial setting.

Clara has volunteered with the Chemistry Student Society and other organizations.
