## LA FONDATION LUCIEN-PICHÉ

---

### 2023 Scholarship Program

The **Fondation Lucien-Piché** is a non-profit charitable organization that was created in 1987 after the passing of Professor Lucien Piché, a chemistry Professor who was the first secular person to occupy a Vice-President position at the Université de Montréal. The Foundation's mission is to encourage undergraduate chemistry students from Québec universities by awarding merit scholarships. The Foundation is managed by a board of directors composed of university Professors, researchers and professionals from the field of chemistry. All members of the board of directors are volunteers. The funds raised and administered by the Fondation are entirely used to support students via scholarships and to cover the operation and maintenance costs. Since its creation in 1987, the Fondation Lucien-Piché awarded close to 120 scholarships for a total of more than 120,000\$. Many of our awardees now occupy leading positions in academia and industry in the province of Québec and abroad. The Fondation is sponsored by 9 organizations that are based in Québec, Canada and USA operating in various fields of chemistry.

**Sascha Woolcott**  
Bourse Lucien-Piché  
Gilead

Sascha is studying Chemistry at McGill University.

She received two NSERC undergraduate student research awards, the Herbert J Brennen scholarship and has been an undergraduate teaching assistant for 4 semesters.

Sascha has also been a youth soccer coach and a member of McGill's varsity field hockey team.

**Léo Boivin**  
Bourse Lucien-Piché  
Corealis Pharma

Léo is studying Chemistry at Université de Sherbrooke.

He received an NSERC undergraduate student research awards and is the first author on a 2023 article that appeared in ACS Applied Materials & Interfaces. He has participated in three research internships.

Léo has also worked part time at the Center of materials research and green processes.

**Félix Cloutier-Artiwat**  
Bourse Lucien-Piché  
Ordre des chimistes du Québec

Félix is studying Chemistry at Université du Québec à Rimouski.

He received two NSERC undergraduate student research awards, was co-author of an article in Biogeosciences and winner of the freshman student-athlete award at UQAR in 2022.

Félix coaches at the Cégep de Rimouski and is a member of two varsity teams at UQAR.
